Round 1 - Bulk Test

Objective: Develop a fully responsive static landing page based on provided assets and design specifications, following a clear set of guidelines for assessment.

Task Overview

Assets:

Access a shared link to assets and a PDF containing the design blueprint for the landing page.

ForntEnd Test

Page Requirements:

- Build a static, responsive landing page.

- Buttons, including "See More" and "Call to Action" elements, should be left unlinked.

- Mobile responsiveness is required.

- The final solution must be deployed on **Netlify**; submissions from any other hosting platforms or link will not be accepted.

Evaluation Criteria and Points (Total - 50 Pts)

- **Next.js Utilization**: The page must be built with Next.js, scoring an additional **10 points**.

- **Responsive Design**: Implement a fully responsive design, scoring **10 points** for a seamless mobile view.

- **CSS Flexbox**: Use of CSS Flexbox for layout management adds **5 points**.

- **Page Speed Optimization**: Achieve a high Google Page Speed Insights score for performance, scoring up to **15 points**.

- **Lazy Loading**: Implement lazy loading for images or other heavy assets, earning **5 points**.

- **Componentization**: Structure the code using reusable React components, adding **5 points**.
